**NOTICE REGARDING THE SUBMISSION OF ELECTRICITY SUPPLIER
ANNUAL COMPLIANCE REPORT FOR THE DISTRICT OF COLUMBIA'S
RENEWABLE ENERGY PORTFOLIO STANDARD**

March 23, 2010

**FORMAL CASE NO. 945, IN THE MATTER OF THE INVESTIGATION INTO
ELECTRIC SERVICES MARKET COMPETITION AND REGULATORY
PRACTICES**

Under the District of Columbia's renewable energy portfolio standard, specific percentages of electricity sales must be from tier one, tier two, and solar energy sources.¹ To meet the District of Columbia's renewable energy portfolio standard, each electricity supplier must purchase tier one, tier two, and solar renewable energy credits ("REC") or pay a compliance fee commensurate with a certain percentage of the number of kilowatt hours of electricity sold by the supplier per year.² A REC is a credit representing one (1) megawatt-hour of electricity consumed within the PJM Interconnection region derived from a tier one, tier two, or solar energy source.³ Waste-to-energy is defined as a tier two source.⁴

Electricity suppliers in the District of Columbia are required to submit an annual report detailing their compliance with the District of Columbia's renewable energy portfolio standard by May 1 each year for the previous calendar year.⁵ Suppliers may not, however, use the incineration of solid waste to meet more than 20 percent of the standard for tier two renewable sources.⁶ In addition, starting January 1, 2013, suppliers are prohibited from using RECs derived from solid waste incineration to meet any part of the tier two standard.⁷

This notice serves to remind electricity suppliers of their obligation to submit their annual renewable energy portfolio standard compliance reports for calendar year 2009 by

¹ D.C. Official Code § 34-1432 (2009 Supp.).

² D.C. Official Code §§ 34-1432, 1434(c) (2009 Supp.).
