# What is Electric Restructuring?

 The DC Council passed legislation at the end of 1999 which permits the DCPSC to introduce competition into the electric industry in the District. Since January 2001, you can choose the supplier of your electring neration and transmission services, while PCO is the only distribution company.

**Distribution** 

### Electric Restructuring

### How We Regulate Generation, Transmission, and Distribution Services

- Generation rates: Prices are market-based. PEPCO procures its power supply through a competitive solicitation under the direction of the Commission and monitored by the Office of the People's Counsel. New rates go into effect on June 1.
- Transmission rates: Prices are regulated by the Federal Energy Regulatory Commission and passed on to consumers.
- Distribution rates: The Commission sets the rate for the distribution portion of the bill through a rate case.

## <u>Questions to Ask Each</u> <u>Alternative Supplier</u>

- What is your price to compare (generation and transmission charges)?
- What are the terms and conditions of the contract?
- Are renewable resources used and to what extent?
- Is there a penalty for switching before the end of the contract? If yes, how much is the fee?
- Are there any additional charges?
- How will I be billed? (Separately or by PEPCO)
- What kind of billing and payment options are available?

Elimination of Cap on PEPCO's Generation and Transmission (G&T) Prices

- Electric rates are divided into generation and transmission (G&T) and distribution services.
- The cap on PEPCO's G&T prices, called Standard Offer Service (SOS) prices were eliminated in February 2005.
- This means electric G&T prices increased for many residential and non-residential customers in February 2005.
- PEPCO posts new SOS prices on its website effective June 1.

## WHAT IS PRICE TO COMPARE?

Answer: The average generation and transmission charges per kilowatt-hour.

## Residential Electric Market Shares (%) as of February 2016

| Items                   | PEPCO              | Others            |
|-------------------------|--------------------|-------------------|
| No. of Customers        | 86.6%<br>(222,579) | 13.4%<br>(34,527) |
| Customer Demand<br>(MW) | 84.9%              | 15.1%             |
| Energy Usage<br>(MWH)   | 88.3%              | 11.7%             |

## Non-Residential Electric Market Shares (%) as of February 2016

| Items                 | PEPCO             | Others           |
|-----------------------|-------------------|------------------|
| No. of Customers      | 65.3%<br>(17,993) | 34.7%<br>(9,569) |
| MW Customer<br>Demand | 16.2%             | 83.8%            |
| MWH Energy<br>Usage   | 13.6%             | 86.4%            |

### 2014 Market Shares (Based on Revenues)

| <u>Item</u>  | <u>Residential</u> | Non-Residential | <u>Total</u> |
|--|--------------------|-----------------|--------------|
| Generation and Transmission Revenues Only          |                    |                 |              |
| PEPCO  | 87%                | 15%             | 30%          |
| Other Suppliers                                    | 13%                | 85%             | 70%          |
| Total  | 100%               | 100%            | 100%         |
| Generation, Transmission and Distribution Revenues |                    |                 |              |
| PEPCO  | 91%                | 45%             | 54%          |
| Other Suppliers                                    | 9%                 | 56%             | 46%          |
| Total  | 100%               | 100%            | 100%         |

## Additional Energy Efficient Ideas

## Watch Your Thermostat

Set your thermostat at a comfortable setting between 65 and 70 degrees during the day and slightly lower at night

When you're away from home for more than a few hours, set your thermostat at 58 degrees.

• Warmer temperatures are recommended for homes with ill or elderly persons or infants.

# Long-Term Tips

Schedule a furnace check-up. Regular maintenance performed by a qualified professional can help ensure the safe, reliable, and efficient operation of your heating system.

Consider purchasing a new, high-efficiency furnace or water heater. If your furnace or water heater is nearing the end of its normal life span or has experienced problems in the past, a new high-efficiency unit can save you as much as 20% on your heating bills.

Consider purchasing a programmable thermostat. A programmable thermostat automatically reduces temperature settings without sacrificing comfort.

### Day-to-Day Conservation Tips

- Change or clean your furnace filter once a month using your natural gas bill as a reminder.
- Seal leaks around doors, windows, and other openings, such as pipes or ducts, with caulking or weather-stripping.
- Replace broken or cracked glass and consider installing storm windows.
- Dress warmly in the home.
- Close vents and doors in unused rooms and close dampers in unused fireplaces.
- Run you washer and dryer with full loads.
- Never use gas stoves/ovens for heating purposes. Continuous burning can lead to Carbon Monoxide hazard.
